Desktop Inspirations

Free Inspirational Wallpaper for Your Desktop

How to Determine Screen Size

The first step in how to install desktop wallpaper is to **determine your screen size.**

In order to choose the correct wallpaper, you must determine your screen size. Here are instructions in how to determine screen size for Windows and Mac machines.

For Windows Users

Right click your desktop screen. Choose Display Settings from the pop-up menu that appears.

Choose Advanced Settings at the bottom of the dialogue box.

The recommended setting will be shown on the Advanced settings page.

For a Windows laptop, the recommended size is 1366x768 or 1920x1080.

For Mac Users

Click the apple icon at the top right of your screen. Choose About This Mac.

When the dialogue box pops up, choose the Displays tab at the top.

Your computer's display size will be shown there.

For my iMac, the setting is 1920 x 1080.

Your desktop will look best if you are able to choose the exact size.

How to Install Desktop Wallpaper

After you have chosen your free wallpaper and downloaded it, here is how to install wallpaper on your computer desktop.

For Windows Users

Right click anywhere on your desktop and choose Personalize from the pop-up menu.

Select Background/Picture in the new Settings window that will open.

Browse to the location where your file is saved, probably your Downloads folder.

Select your Desktop Inspirations wallpaper. It will show up immediately on your desktop.

That's it! Enjoy!

For Mac Users

Control/Click on your computer desktop.

Choose Change Desktop Background.

Browse to find your download. (Hint: Click the plus sign to browse more locations on your computer.)

Select your file. Done!
